2026 is to September 30, 2026.

How we invest

Core first

Most of the portfolio is high-quality bonds that behave like the index when markets fall.

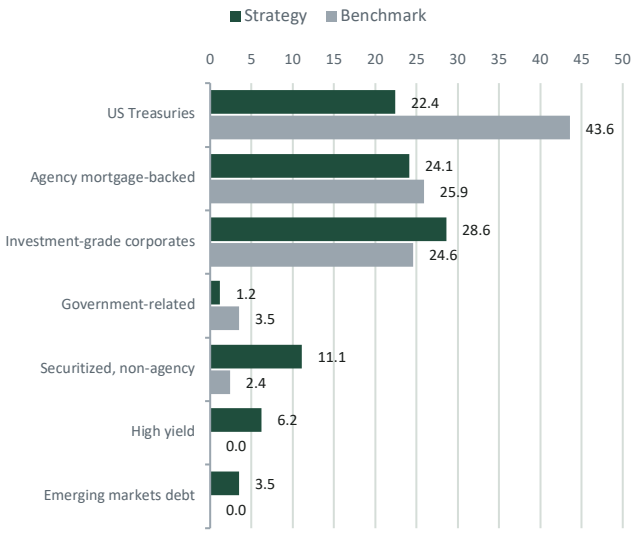

Plus, measured

High yield, securitized and emerging markets debt, each within limits, and only where we're paid for the risk.

Duration near the index

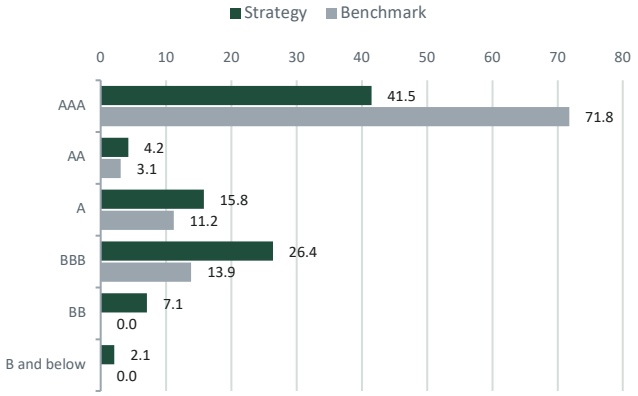

We add value from the bonds we own, not from bets on the direction of interest rates.

Sector allocation (%)

Cash 2.9% of the portfolio.

Credit quality (%)

Characteristics

	Strategy	Benchmark
Number of issues	612	13,418
Effective duration	6.2 years	6.0 years
Yield to worst	5.4%	4.6%
Average credit quality	A+	AA
Option-adjusted spread	118 bp	41 bp
Turnover (trailing 12 months)	142%	—

Risk, five years, gross

Volatility	4.1%	Tracking error	1.1%
Benchmark volatility	3.9%	Information ratio	0.44
Beta	1.03	Upside capture	102%
		Downside capture	93%

Wei Lin
Portfolio Manager, Securitized. 14 years in the industry, 6 at Larchmere.

Important information

Larchmere Investment Management is a fictional company. Everything in this document, its strategies, people, indices, holdings and figures, is made up to demonstrate docMentis, and none of it describes a real investment, index or company. Nothing here is investment advice or an offer of any security.

Past performance does not guarantee future results. Returns are in US dollars. Gross returns are before management fees and after trading costs; net returns deduct the strategy's highest standard management fee, applied monthly. Returns for periods over one year are annualized.

The Merrow indices are fictional benchmarks, made up for this demonstration like the rest of the document. Holdings, sectors and characteristics are of a representative account.
