2026 is to September 30, 2026.

How we invest

Quality first

Companies that earn high returns on capital and can keep reinvesting at them, with strong balance sheets and management we trust.

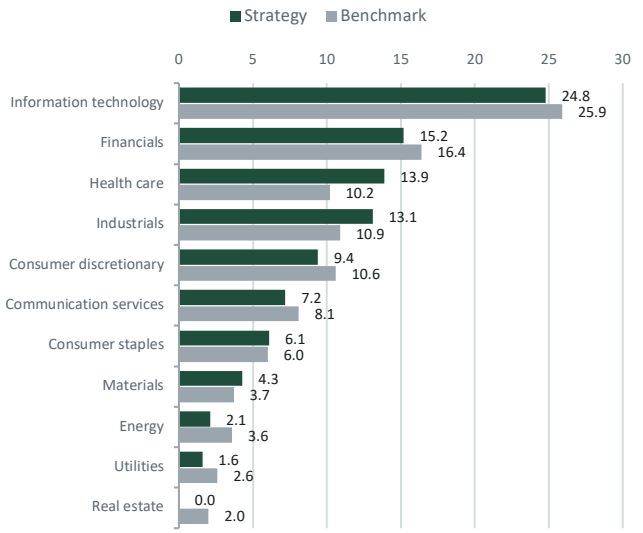

A sensible price

Every holding has a written valuation case and a price at which we would sell it. We pay for quality, not for hope.

Patience

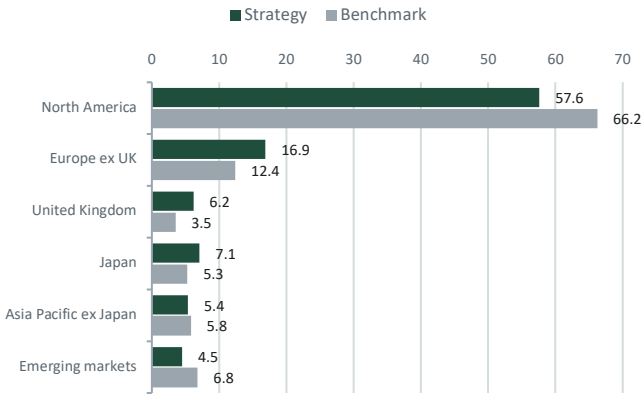

A five-year horizon and turnover near 25% a year: we let compounding do the work, and engage as owners.

Sector allocation (%)

Cash 2.3% of the portfolio.

Regions (%)

Top ten holdings (%)

Company	Country	Weight
Halvern Semiconductor	United States	4.1
Orris Health Systems	United States	3.6
Brightwell Payments	United States	3.3

Important information

Larchmere Investment Management is a fictional company. Everything in this document, its strategies, people, indices, holdings and figures, is made up to demonstrate docMentis, and none of it describes a real investment, index or company. Nothing here is investment advice or an offer of any security.

Past performance does not guarantee future results. Returns are in US dollars. Gross returns are before management fees and after trading costs; net returns deduct the strategy's highest standard management fee, applied monthly. Returns for periods over one year are annualized.

The Merrow indices are fictional benchmarks, made up for this demonstration like the rest of the document. Holdings, sectors and characteristics are of a representative account.
