How we invest

Essential assets

Networks, roads, airports and towers whose services people and businesses can't do without.

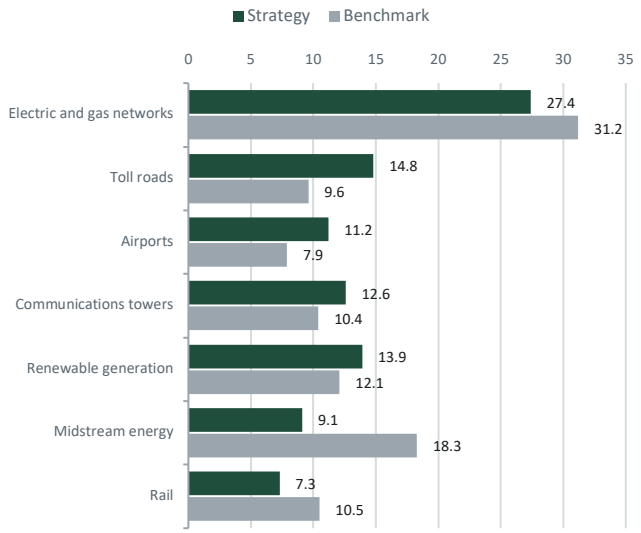

Contracted revenues

We favor revenues that are regulated or set by long contracts, often linked to inflation.

Sound balance sheets

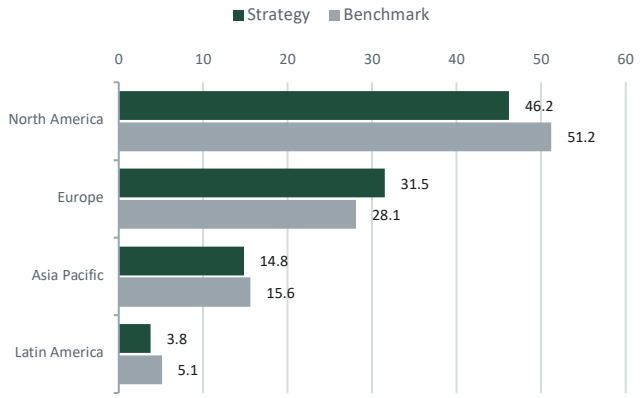

Long-lived assets need long-dated debt: we avoid companies that must refinance at the wrong time.

Sector allocation (%)

Cash 3.7% of the portfolio.

Regions (%)

Important information

Larchmere Investment Management is a fictional company. Everything in this document, its strategies, people, indices, holdings and figures, is made up to demonstrate docMentis, and none of it describes a real investment, index or company. Nothing here is investment advice or an offer of any security.

Past performance does not guarantee future results. Returns are in US dollars. Gross returns are before management fees and after trading costs; net returns deduct the strategy's highest standard management fee, applied monthly. Returns for periods over one year are annualized.

The Merrow indices are fictional benchmarks, made up for this demonstration like the rest of the document. Holdings, sectors and characteristics are of a representative account.
